FLY CHAIR SC1

BY SPACE COPENHAGEN
2013

The Fly Series by Space Copenhagen is a lounge collection made up of two sofas, an armchair, two tables and a pouf. Pushing the idea of lounging to its fullest, Fly is a series that allows the user to sit, lie, rest, and relax. Unlike many of the sofas and easy chairs in Scandinavian design history, Fly does not impose any particular posture onto the sitter. The seat itself is optimised for comfort, with loose cushions for the back that can be arranged according to the user's own needs. But Fly adheres to tradition in other respects; the frame of the sofa and armchair, with a slatted back rest, is made from solid oak, treated with white pigmented oil or smoked oil. It is the type of material and treatment that ages with true grace, only becoming more beautiful with time.

Space Copenhagen gathers much of their inspiration from travels abroad, often in the form of ambience and mood. An example could be as simple as a particular wall in the streets of SoHo, New York, the distressed look of which makes its way into Space Copenhagen's imagination.

Product type	Armchair.
Production Process	The Fly range is hand built from solid oak and oak veneer using traditional woodworking techniques. The pillows are made from CMHR foam and feather and upholstered in fabric.

FLY CHAIR SC10

BY SPACE COPENHAGEN
2017

Endearing in size and shape, the Fly Chair SC10 is the newest addition to the Fly Lounge series designed by Space Copenhagen founders Signe Bindslev Henriksen and Peter Bundgaard Rützou.

The Fly Lounge Series was created with the ultimate comfort in mind. The lovely loose cushions that comprise the back can be arranged and rearranged to suit your personal preferences. The design alludes to a Nordic aesthetic, such as the slatted back, the handcrafted solid oak frame and the organic shaped elements.

“We like the idea that comfort comes first,” says &tradition Brand Manager Martin Kornbek Hansen. “With the Fly Chair Small, it’s a modern design that encompasses classic woodworking techniques drawing on the beauty of natural materials destined to age gracefully over time. The epitome of tradition fused with innovation.”
