

## FLOW | INDOOR - OUTDOOR

design Shibuleru

Rocking Chair available for indoor and outdoor.

**Indoor version:** supporting frame in Ø25 mm tubular steel coated with polyester epoxy powder gunmetal grey color and plastic runners. Nonremovable upholstery, hooked to the frame through technical parts coupled to it, available in fabric or leather sewn together with a supporting material. Headrest in polyurethane foam covered with fiber layers, integrated into the covering. Small armrest in Stainless Steel AISI 316 sheets, secured to the frame with screws in Stainless Steel, coupled with non-removable black hide or coated with polyester epoxy powder gunmetal grey color.

**Outdoor version:** supporting frame in Ø25 mm tubular Stainless Steel AISI 316 coated with polyester epoxy powder gunmetal grey color and black PVC runners. Non-removable upholstery hooked to the frame through technical parts coupled to it, available in the outdoor fabrics only, sewn together with a supporting material. Headrest in open cell structure polyurethane foam, coated with polyester fiber and draining fabric cover. Small armrests in Stainless Steel, secured to the frame with Stainless Steel screws, coated with polyester epoxy powder gunmetal grey color.

For both versions, upholstery available woven with a hypoallergenic, recyclable, eco-friendly tubular (Readymade Un Pizzo) suitable both for indoor and outdoor, in the colors in collection. For the woven version only the headrest, not integrated into the covering, is joined to a counterweight in Stainless Steel AISI 316 coated with epoxy powder gunmetal grey color, by a weaving (made by Un Pizzo) always in the same color of the seat part.

### Notes

For the OUTDOOR version, it is recommended to use a "Protective Cover" to improve the longevity of products; please note that the protective cover is made of a water vapor repellent fabric, perfect to prevent and protect from the formation of mold, easily washable with water and soap. Do not keep the fabric folded for a long time when it is wet. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website. Lastly, we recommend placing the product on terraces or verandas to guarantee its durability over the years.

According to the product shape, some coverings cannot be used; please refer to the adaptability sheet in the "Materials" section of the website.

For leather coverings the "Leather A" or "Leather B" Maintenance Kit is included with the product.
