

KASBAH | OUTDOOR

design David Lopez Quincoces

Modular elements of different sizes that allow multifunctional compositions, with supporting frame in solid Teak wood section 90x35mm and seat panel in black milled HPL 8mm thick inset into the supporting frame and supported by corner and central molded supports in recycled and regenerated polyamide, secured with Stainless Steel screws. Bolster armrest venue in multilayer panel for outdoor use veneered with Teak slabs, milled with slats and coupled with fabric for outdoor use, featuring grooves for water drainage. Backrest structure in plywood for outdoor use, solid fir wood and polystyrene with differentiated density TCL open cell polyurethane foam padding, covered with a recycled microflock mat for outdoor use Seat depth 65 cm. Available table freestanding or used in composition. and draining fabric cover, fixed to the seat panel through printed

details; seat cushions padded with differentiated densities TCL open cell polyurethane foam, covered with mat made of recycled microflock for outdoor use and draining fabric cover, bolster armrest in TCL open cell polyurethane foam and draining fabric cover. Feet in solid Teak wood Ø40mm, fixed to the corner supports through embedded bushing, and floor ground support guaranteed by black adjustable plastic elements. Upholstery with outdoor fabrics only, fully removable by zippers and Velcro fastenings.

The various elements can be assembled through a central bracket fitted also to host the solid Teak wood feet.

Structure and Feet

Notes

For double-sided compositions is always to foresee the use of a backrest with double filling For compositions with different elements and coffee tables, please attach a general sketch to the order.

The various elements are joined together by brackets, as shown in the drawing below.

The solid Teak comes from certified plantations. It is an extremely resistant material, thanks to the presence of an oleo-resinous component that guarantees excellent durability. We also remind that Teak is a living material that reacts to external factors. Prolonged and continuous exposure to them changes the surface layer, up to oxidation which gives it a silvery-grey tone. Moreover, it can show small alterations in color and size. Teak may therefore present not homogeneous shades of color, to be considered as a quality and not a defect. For the maintenance of Teak kindly follow the instructions included in the maintenance kit supplied with the product.

Especially after prolonged rainy or humidity periods, it is suggested to rotate the elements and/or to temporarily lift the seat/back/armrest cushions to allow a complete drying and to avoid accumulation of dirt and moisture, causing the formation of mold.

It is recommended to use a "Protective Cover", to be put over a completely dry product, to improve its longevity; please note that the protective cover is made of a water vapor repellent fabric, perfect to prevent and protect from the formation of mold, easily washable with water and soap. It is always recommended to completely dry the cover. Do not keep the fabric folded for a long time when it is wet. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website. Lastly, we recommend placing the product on terraces or verandas to guarantee its durability over the years.

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality. Please note that the direct sunlight exposure may alter the wood color; therefore, we recommend the periodic position shift of the objects placed on the furniture for the first months to avoid differences in shades between exposed and covered portions.

According to the product shape, some coverings cannot be used: please refer to the adaptability sheet in the "Materials" section of the website.

For wooden finishing the "Outdoor Wood" Maintenance Kit is included with the product.
